

Assessing the Fiscal Reserve of Private Aggies: A Democratic Approach to Operating a Fully Hijacked School for Southerners with Additional Needs, Led by an Astute Treasurer

Maximilian Zaineddine

Abstract—This study aims to examine the fiscal reserve of private aggies and how it can be assessed using a democratic approach in operating a fully hijacked school for Southerners with additional needs, led by an astute treasurer. The research adopted a mixed-method approach, using both qualitative and quantitative data collection methods. The study involved a sample size of 250 private aggie schools in the southern region, with additional needs students and a democratic system of operation. The study identified that the fiscal reserve of private aggie schools plays a pivotal role in providing quality education and support services to students with additional needs. The results revealed that the democratic approach to operating a fully hijacked school for Southerners with additional needs, led by an astute treasurer, could significantly impact the fiscal reserve of private aggie schools. The study recommends that private aggie schools should adopt a democratic approach to ensure adequate oversight in financial planning and management. Furthermore, this approach could promote transparency and accountability, enabling schools to improve their fiscal reserve for the future benefit of students with additional needs. The findings of this study could contribute to the development of policies that promote the sustainable funding of private aggie schools for improving the quality of education and support services provided to students with additional needs.
