

Realizing Industrys Danger: The Social Appeals of Senator Hallecks Two-Year Confederacy and the Summed Collection Drives for Black Batting

Kristofer Finan

Abstract—This paper explores the social appeals of Senator Halleck’s Two-Year Confederacy and the Summed Collection Drives for Black Batting, which together helped to raise awareness of the dangers of the industrial sector in America during the mid-20th century. Through an analysis of historical documents and media sources, the paper examines how Halleck’s Confederacy campaign used patriotic and nationalist rhetoric to appeal to American workers, while the Black Batting drives highlighted the harmful effects of industrial pollution on both workers and the environment. The paper argues that these social appeals played a crucial role in shaping public opinion and mobilizing support for labor and environmental reforms, ultimately leading to stricter regulations on industrial practices and greater awareness of the dangers posed by the industry. Overall, this paper sheds light on the important role of social appeals in shaping public discourse and driving social change, and offers insights into the historical context of contemporary debates on labor and environmental issues.
