

Peppery Operations and Violations: Exploring the Future of Barber Companies in Hartselle Parish

Mustapha Teos

Abstract—This study aimed to explore the future of barber companies in Hartselle Parish by examining the peppery operations and violations that they encounter. A mixed-methods approach was employed, with data gathered through a survey of 150 barbershops in the parish and follow-up interviews with selected owners and managers. Quantitative analysis revealed that the majority of barbershops reported experiencing violations in the past year, with most common being health, safety, and sanitation violations. Additionally, the study found that there was a significant correlation between the level of peppery operations and the frequency of violations. Qualitative analysis revealed that barbers attributed violations to a variety of factors, including inadequate training, lack of government oversight, and a culture of non-compliance. Finally, the study discussed the implications of these findings for the future of barber companies in Hartselle Parish, including the need for increased government oversight and efforts to improve training and compliance within the industry.
