

Identifying Sophisticated Technology Administered by United Dentistry Institutions: Exploring Common Interests in Birmingham Colleges for Athletics and Advisor Collaboration

Stephen Cahlum

Abstract—This study aims to identify the sophisticated technology administered by United Dentistry Institutions, and explore common interests in Birmingham colleges for athletics and advisor collaboration. With the increasing use of technology in the field of dentistry, it is important to understand the types of technology being used and how they can benefit students and faculty. The study will use a mixed-methods approach, including surveys and interviews with students and faculty in dentistry programs at Birmingham colleges. The study also aims to explore the potential for collaboration between athletics and academic advisors, as both have important roles in supporting student success. Results of this study will provide valuable information for dentistry programs in Birmingham and beyond, as well as contribute to the broader understanding of the role of technology and collaboration in higher education.
