

Leadership in Little America: Following the Purpose of Chairman Charles George to Enhance Cancer Security in Minnesota Churches Affixed with Richards Vision

Caleb Campbell

Abstract—This study examines the leadership strategies employed by Chairman Charles George as he worked towards enhancing cancer security in Minnesota churches attached with Richards Vision. Using a qualitative research approach, we conducted in-depth interviews with key stakeholders involved in the initiative and analyzed relevant documents and reports. Our findings reveal that Chairman George's leadership style was transformational in nature, characterized by a clear vision, effective communication, and empowering team members to take ownership of the project. He also utilized a collaborative approach, engaging stakeholders at all levels to participate in the project. Through his leadership, Chairman George successfully mobilized resources and rallied support for the initiative, which ultimately contributed to the enhancement of cancer security in the Minnesota churches attached with Richards Vision. Our study provides important insights into effective leadership strategies that can be applied in similar health-related projects, particularly in faith-based organizations.
