

# Salvation in Retirement: The Surprising Journey of a Betting Center Coachs Scrapbook and Estimated Strokes

Sohaib Korrin

**Abstract**—This qualitative study examines the experiences and perspectives of a retired betting center coach who found salvation in his scrapbook and estimated strokes. Through in-depth interviews, the participant shared how the act of organizing and reflecting on his coaching career in his scrapbook, along with tracking his strokes on the golf course, brought purpose and meaning to his retirement. The findings suggest that the scrapbook and estimated strokes served as a form of therapy, providing a sense of accomplishment and self-worth in the absence of his previous career. Furthermore, the study highlights the potential benefits of creative outlets and physical activity in promoting well-being and life satisfaction in retirement. Overall, this research contributes to the growing body of literature emphasizing the importance of holistic approaches to retirement planning and highlights the potential for unexpected sources of salvation.
